PERSONAL SUMMARY

Solid background in Problem Solving, Process Migration, and Data Administration; at the moment, developing strong skills in Web Development and Web Design. Recognizing the importance of Design and Coding knowledge, I have already gained experiences in Frontend and Backend projects. My learning path is continuously evolving toward new frameworks and libraries covering the technical side, the graphical aspect and the UI/UX interaction. Understanding the influence of Digital Media assets in various fields, my activities are also involving areas related to Blockchain and 3D environment. Overall, creativity and technology are my main focus and area of interest.

TECHNICAL SKILLS:

- Front-End Development with HTML/CSS/JavaScript.
- Debugging skills.
- Understanding of modern web practices.
- Knowledge of PHP / MySQL.
- Use of version control Git/GitHub.
- Back-End projects with MVC structures (Node/Express, Laravel).
- Practicing on Blockchain and Smart Contract development.
- Experience with test environments.
- Front-End library/frameworks (React / Vue).
- Adobe Creative Package and Cinema 4D.

PERSONAL SKILLS:

- Able to work individually or in a team.
- Clear and effective communication skills.
- Able to meet tight deadlines.
- High attention to details.
- Problem Solving experience.
- Willing to work and learn with emerging technologies.
- Interact clearly to both technical / non-technical audience.
